Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

Claims 1-23 (cancelled).

24. (currently amended) A removable elastic positioning appliance comprising:

a shell <u>having a hollow cavity</u> shaped to receive and reposition teeth from a first orientation to a successive orientation, the shell having at least one protrusion <u>disposed along an edge of the hollow cavity</u>, which <u>protrusion</u> contacts at least one received tooth to assist in holding the appliance in position.

- 25. (original) An appliance as in claim 24, wherein the at least one protrusion is configured to contact an interdental area.
- 26. (original) An appliance as in claim 24, wherein the at least one protrusion is configured to contact a tooth along at least a portion of its gingival margin.
- 27. (original) An appliance as in claim 24, wherein the at least one protrusion comprises a continuous protrusion which is configured to contact one or more teeth along the gingival margin and interdental areas.
- 28. (original) An appliance as in claim 24, wherein the at least one protrusion is mountable on the appliance.
